Saint Joseph FM resident physicians care for underserved patients in a community-based hospital and clinic located in downtown Denver. Residents learn a wide variety of procedures and practice full-spectrum medicine in a supportive environment, enabling them to succeed in any practice setting. An encouraging and engaged faculty help residents pursue individual interests such as women's health, sports medicine, or global health. A strong wellness curriculum paired with an empathetic culture helps residents maintain a healthy work-life balance.

Southern Colorado Family Medicine (SCFM) is located in a small sunny town with so many outdoor activities, beautiful Pueblo, CO.

SCFM is a dually accredited allopathic and osteopathic three-year program, now with osteopathic recognition under the single accreditation program. We are un-opposed and emphasize one-on-one teaching. We pride ourselves in giving our residents autonomy and the opportunity to learn hands on family medicine skills in OB, endoscopy, office procedures to include OMT, inpatient and outpatient medicine directly from full scope clinical faculty and specialists. Over half of our graduates practice full scope family medicine upon graduation, many serving in rural areas. 3rd and 4th year Medical Student rotations are available however changed due to current restrictions.

St. Anthony North Health Campus is a single-residency community hospital within the Centura Health network. This state-of-the-art facility offers an ICU, GI lab, cardiac cath lab and level III trauma center. We are proud of our patient care in outpatient medicine, inpatient medicine, obstetrics and pediatrics. Our Diversity, Equity and Inclusion Committee has been working for the past 2 years on a 3-prong approach to transformation – education, action and building a pipeline for lasting change.

There are three outpatient offices within the residency: 84th Ave Neighborhood Health Center, Orchard Neighborhood Health Center and Thornton Neighborhood Health Center. All clinics fully embrace the patient-centered medical home and operate under the team-based care model. We serve a very diverse group of patients, including care of underserved populations. All clinics provide full-spectrum family medicine service and have comprehensive integrated care team support including integrative medicine services.

Our program offers specialized curriculum tracks in sports medicine, integrative medicine, acupuncture, high risk OB & surgical delivery, and hospitalist medicine. We offer multiple fourth year fellowship opportunities including: Maternal-Child Health, Emergency Medicine, Integrative Medicine, Population Health, Faculty Development, Osteopathic Medicine and Sports Medicine.

[North Colorado FMR Blog](#)

[NCFM Sterling Rural Program Brochure](#)

First year of training takes place in Greeley, Colorado with our Core Program with robust experiences in clinic, inpatient adult medicine, inpatient pediatrics, outpatient pediatrics, inpatient obstetrics/nursery, emergency medicine, intensive care nursery and adult intensive care unit block rotations. Second and third years of training, except for away elective rotations, take place 100 miles northeast of Greeley in Sterling, Colorado, a community of 14,000 featuring a rural health clinic attached to a 25-bed hospital. The longitudinal curricular approach in Sterling leads to extensive clinic and daily inpatient educational experiences including operative obstetrics, gastrointestinal endoscopy, emergency medicine, sports medicine and skilled nursing facility medicine. Graduates of this program will be highly trained for broad-spectrum family medicine in any rural location.

Wray Rural Training Track

[Wray RTT webpage](#)

[North Colorado FMR Blog](#)

[NCFM Wray Rural Program Brochure](#)

The first 15 months of training take place in Greeley, Colorado with our core program with robust experiences in clinic, inpatient adult medicine, inpatient pediatrics, outpatient pediatrics, inpatient obstetrics/nursery, emergency medicine, intensive care nursery and adult intensive care unit block rotations. The remaining 21 months of training, except for away elective rotations, take place 140 miles east of Greeley in Wray, Colorado, a community of 2,300 featuring a rural health clinic attached to a 12-bed hospital. The longitudinal curricular approach in Wray leads to extensive clinic and daily inpatient educational experiences including operative obstetrics, gastrointestinal endoscopy, emergency medicine, sports medicine and skilled nursing facility medicine. Graduates of this program will be highly trained for broad-spectrum family medicine in any rural location.
